Electric semi-automatic Label Dispensers

Dispensa-matic 10II & 16II Up to 381mm wide (15")

FOR LARGE ROLL LABELS (Butt Cut Or Die Cut)

These new high speed units will enhance application of most large labels on rolls up to 229mm (9") in diameter and up to 380mm (15") in overall width. Any depth of label 1 across and up to 76mm (3") deep for multi widths.

Reel Diameter
Max. 225mm

Core Size
Min. 25mm - Ideal 75mm

FOR FANFOLD LABELS

Will handle 1 across fanfold labels of any depth and multi width formats up to 406mm (15") maximum web width. Any depth of 1 across label and up to 76mm (3") deep for multi widths. Adjusts to all widths and can be changed from roll to fanfold in seconds without the need for tools.

Laser-Peel A4 Sheet Label Dispenser

The Laser-Peel is full of unique features and has been designed and built around many years experience of sheet label users requirements.

Most popular formats of Laser, Inkjet and Copier Labels can be dispensed with a minimum leading edge of 12mm.

The inbuilt microprocessor automatically adjusts for different label sizes.

Up to 100 sheets can be loaded at a time and single sheet or automatic feed selected at a touch of a button.

Right or left-handed operation by simple repositioning of the label sensor.
